SUMMARY

Environmental Studies graduate with hands-on restoration monitoring, structured data management, QA/QC, trend analysis, and GIS mapping tools. Brings a 3.97 GPA, strong documentation habits, and experience translating field observations into accurate, usable datasets for collaborative research.

EDUCATION

University of Oregon, Eugene, OR | B.S. Environmental Studies | Minors: Earth Sciences, Sociology | GPA: 3.97/4.00 | **Cum Laude** | Phi Beta Kappa | 9x Dean's List

EXPERIENCE

Environmental Field & Data Analysis Intern | Environmental Leadership Program / McKenzie Watershed Council | Jan-Jun 2026

- Supported restoration monitoring at a multi-acre Quartz Creek floodplain restoration site through a competitive, project-based research internship.
- Built and maintained structured Excel and Google Sheets datasets; performed data cleaning, validation, and trend analysis.
- Authored QA/QC standards supporting data accuracy and reproducibility across an 11-person research team.

Administrative Coordinator | KWVA Eugene 88.1 FM, University of Oregon | Sep 2023-Jun 2026

- Managed office operations, records, scheduling, and compliance tracking for a 100+ member organization.
- Built a digital inventory system cataloging 1,500+ media assets, improving data integrity and retrieval.
- Coordinated recruitment, onboarding, event logistics, and communication among staff, volunteers, and community members.

Founder & Volunteer Program Coordinator | KWVA Eugene 88.1 FM | Sep 2023-Mar 2026

- Founded and developed a recurring volunteer program; led weekly meetings for groups of approximately 30 members.
- Managed recruitment, onboarding, meeting facilitation, and ongoing coordination as the program's core organizer.

Marketing & Content Intern | Talk Street Media, LLC | Feb-May 2026

- Produced interview and product-review content for direct-to-consumer brands across Instagram, TikTok, and YouTube.
- Developed interview scripts aligned with brand mission, audience, and product positioning.

SKILLS

GIS mapping tools | Environmental field data collection | Data cleaning and validation | QA/QC protocols | Trend analysis | Excel | Google Sheets | Project coordination | Technical documentation | Community engagement
